Professional Profile

I have been working with **Android Studio** since 2019, the period during which I developed skills on both Server side as well as the Client Side.

Since 2020, I have been engaged in **Web Development**, learned basic skills of web development for about Two Months

Still was more attracted towards the Application Development, so started working with **flutter,** developed technical skills on both Server side as well as Client Side

Till date I have successfully created Android Application, my Portfolio Website as well as the Flutter Applications having the Real-World Solution, which I'm very Proud of !

Core Skills

- Android Development (JAVA)
- Flutter Development
- Firebase
- Presentation
- Communication Skills (English)

Have Knowledge of

- HTML
- CSS
- JavaScript
- PHP
- MySQL
- Bootstrap

Summary Skills

➤ I've Developed an Android Application named **CR Alloter** which was basically the Solution to the Election that are being conducted in Collages.

➤ But still was not happy with the Solution that I created as that would run only on the Android applications and was not satisfied with it's UI as well as it's working.

- Later, was more Inspired with Flutter and created an Application named **Electee** having the Common Solution to the Election that were being Conducted at the Local Level (Same Objective as CR Alloter) having all the Facilities that the User can ever think of.

- Recently, I've took over a project which is basically an Employee Management Application which is under Construction till Date.

- With the Web Development Skills I've created my Portfolio.
